

## Course Description

### Information Security Awareness

NSE 1 is the entry-level designation of the Fortinet Network Security Expert (NSE) program.

This course outlines today's cyberthreats and advises how you can secure your information.

#### Formats

Self-paced online

#### Agenda

1. The Bad Actors
2. Data Security Perspectives
3. Password Perspectives
4. Internet Threat Perspectives
5. Insider Threat Perspectives

This course also includes other optional content and resources.

#### Objectives

After completing NSE 1, you will have a general understanding of the following:

- Who are the bad actors behind cyber-attacks and what motives them
- The methods of attack that the bad actors use

- Best practices to protect yourself and the information you are entrusted to secure
- Key cybersecurity terms

#### Who Should Attend

This course is open for free enrollment to anyone who wants to learn about the threat landscape and information security.

#### Prerequisites

There are no prerequisites to take this course.

#### System Requirements

To take this course, you must use a computer that has the following:

- A high-speed Internet connection
- An up-to-date web browser (Google Chrome works best in our environment)
- Speakers or headphones
- One of the following:
  - HTML5 support
  - An up-to-date Flash runtime environment

## Certification

This course completes the requirement to obtain the NSE 1 certification level.

NSE 1 is part of the Fortinet NSE Associate designation. Candidates must pass NSE 1, NSE 2, and NSE 3 to be designated as a Fortinet NSE Associate. The NSE 1 certification is valid for two years from the date of completion.
